Idea

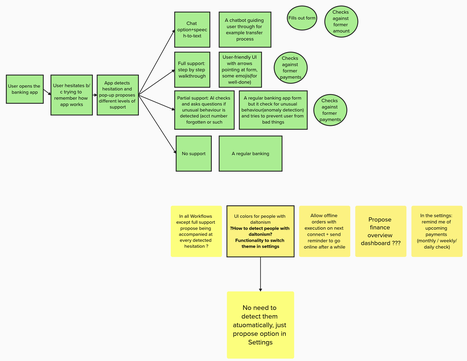
Optimized banking app access for neurodiverse or other people in order to have "somebody who can explain" at hand at every usage of the banking app

Idea 2 (optional)

App reminds the user that the last two years at that time they paid their phone contract and asks if they want to do that today

Idea 3 (optional)

Fraud detection: unusual amount of withdrawal is detected, so we would initiate a call to the support person the client has nominated



Transaction filelds:

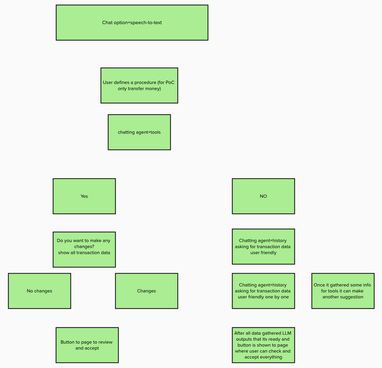
- name + surname
- bank_account
- amount
- transaction_text

Unusual behavior:

- if amount is outlier (IQR)
- check the fileds using other features in SQL (e.g. find row by full name and check other fields)
- string similarity?

- last transactions
- last transactions to the specific user

User table	Transactions	Person to contact table	
• user_id PRIMARY • name • surname • email • date_of_birth • bank_number • person_to_contact_id FOREIGN • username • password	• transaction_id PRIMARY • sender_id FOREIGN • receiver_id FOREIGN • receiver_name • relciever_surname • amount • transaction_date_and_time • amount_before • amount_after • Transaction type • Transaction posted (Yes/No) • Transaction Text	• person_to_contact_id PRIMARY • name • surname • phone_number • email	



Pitch Script

Material to use in the Pitch

"According to WHO, 1.3 billion people – 16% of the world's population – live with significant disability; a large share are neurodevelopmental or mental conditions."

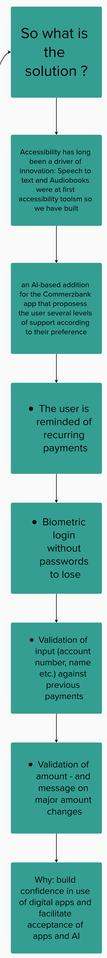
If we look only at autism ("1%), ADHD (about 8% of children, ~2–7% of adults), specific learning disorders (~5–15% of children) and intellectual disability ("0.1–1.5%), it is very conservative to say that **at least 10–15% of the world's population meets criteria for one or more neurodevelopmental or specific learning disorders** at some point in life, not counting other neurodivergent profiles.

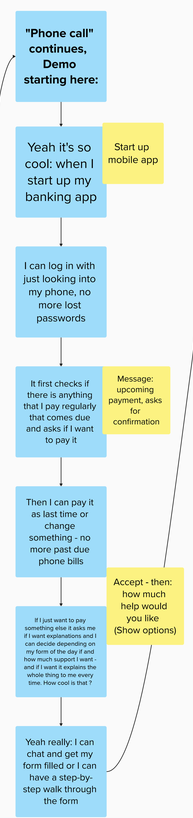
UN: "Reasonable accommodation" means necessary and appropriate modification and adjustments not imposing a disproportionate or undue burden, where needed in a particular case, to ensure to persons with disabilities the enjoyment or exercise on an equal basis with others of all human rights and fundamental freedoms.

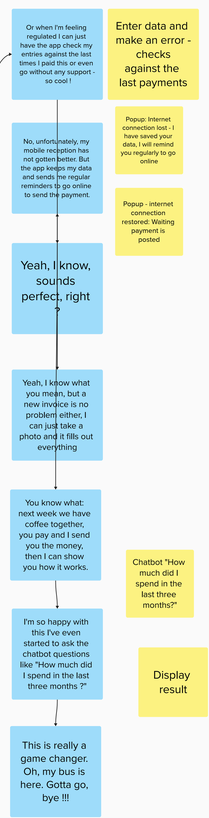
- Convention on the Rights of Persons with Disabilities (CRPD)
  - Article 2 – Definitions

Universal design / Universal Design for Learning (UDL): design environments and curricula so that most people (including neurodivergent people) can participate *without* needing individual exceptions.
oas.org+1

Towards the end: "I've even started to use other feature, like ask the app how much money I spent last week - if it continues ike that I might even pick up money skills ;-)......"







Principle: WCAG

Universal Design: usable for everybody, but adapting to most
